

**Curriculum Feedback Collection, Analysis
and Action Taken Report**
For
Academic Year 2021-2022

Master of Business Administration (Information Technology)	
A.Y. 2021-2022 Action taken report	
Particulars / Action Point	Action Taken
Students Feedback for design and review of syllabus discussed with the students in the open house.	The feedback is above 8 points from students. The further improvement will be consider in next Programme review committee. We are in process of proposing Programme structure for this year. These suggestions will be incorporated for the same.
Teachers suggested courses/topics in term I as Mobile Analytics is not required. Should be replaced with another subject (e.g. Big Data). CO Inices could be added, Course Name - System security and Business resilience - ISO 27001 - Information Security Management System - ISO 22301 - Business Continuity Management System. Internal Audit practices - ISO 19011 - Auditing Standards. Instead of new courses the existing course needs revamp in terms of alignment to industry needs. The students are not prepared with prerequisite courses like Statistics well enough - this needs urgent attention. The evaluation criterion is completely not in sync with the industry Standards. Courses suggested in Term II are Apache NDK/Kafka, Model development for Distributed for Big data problems.	The suggestions are noted, and these points will be put forward in next Programme review committee for the further discussion. Accordingly, the further decisions of change in Programme structure will be taken. Some of the suggested topics/courses that are not in the current Programme structure can be offer as 'Flexi-credit' course. Suggested topics will be taken as value added courses/flexi credit courses
Alumni suggested courses/topics as Emotional intelligence	Topic suggested does not align with the MBA/IT Programme, therefore cannot be included
